

Literature Mapping using Research Rabbit

Name of the Participant : C.V.K.Bhanu
Email : bhanucvk@gvpce.ac.in / bhanucvk68@gmail.com

Research Topic : Demand Response

Reflections on the usage of Research Rabbit for Literature Mapping:

Based on the research topic, it recommends a few research articles which map closest to the given topic. We can add the appropriate papers to the collection from the recommended papers. Then each paper can be critically reviewed along with the papers with similar work, works of the same authors in the same area etc. All these papers can be listed and imported in one of the formats - BiBTeX, RIS and CSV.

The above list can be used for further usage for successfully carrying out our literature survey. This saves lot of time.
